Jl. Manglid Blok E No.1, Kota Bogor, Jawa Barat

I am an undergraduate Computer Science student at Binus University, specializing in backend development using Spring Boot and React. Passionate about building 5+ creative projects, I enjoy transforming ideas into practical solutions through project-based work. I am eager to contribute to technology-driven projects, continuously improve my skills, and make a meaningful impact in the software development field.

## Education Level

---

### Universitas Bina Nusantara - West Jakarta

Sep 2023 - Sep 2027 (Expected)

*Undergraduate of Computer Science, 3.30/4.00*

- Building an e-commerce called B-COD for the Binus University community with secure COD transactions. Developed with Laravel and React.js, highlighting software engineering in features and Agile methodology in iterative team-based execution
- Assisted in teaching a preschool class of 12 children, delivering interactive activities and supporting early childhood development. Gained skills in communication, patience, and classroom management.

## Personal Project Experiences

---

### 2025 NBA Player Stats

Nov 2025 -

*Java Spring Boot, ReactJS, PostgreSQL*

NBA Stats Web App is a full-stack platform with React frontend and Spring Boot backend, using Python/BeautifulSoup to scrape data and display interactive tables and visualizations

- Developed a full-stack NBA Stats Web App with React frontend and Spring Boot backend.
- Scrapped and processed 550 + NBA player stats from basketball-reference.com using Python and BeautifulSoup.
- Stored data in a relational database and implemented backend APIs for data access.
- Built interactive tables and visualizations for player and team statistics.

### Fitness AI Microservices

Oct 2025

*Java Spring Boot , ReactJS, RabbitMQ , Gemini API, PostgreSQL*

Fitness AI Microservices is a fitness tracking platform built with Spring Boot, using RabbitMQ for inter-service communication, Keycloak for secure authentication, and Gemini API for AI-powered personalized recommendations

- Developed a scalable fitness tracking platform using Spring Boot.
- Designed and implemented 5 modular microservices communicating via RabbitMQ.
- Integrated Keycloak for secure OAuth authentication.
- Deployed AI-powered personalized recommendations using Gemini API.

### Food Diary

Oct 2025 -

*Java Spring Boot, ReactJS, PostgreSQL*

DailyBytes is a food diary app built with Spring Boot and Angular, allowing users to log meals for the day with secure authentication and a simple, intuitive interface.

- Developed a meal logging application using Spring Boot backend and Angular frontend.
- Designed a simple and intuitive interface for daily meal entry.
- Implemented secure authentication for user accounts using JWT token.
- Built a REST API to handle meal data efficiently.

## Skills

---

- **Hard Skills:** Python, Java, Spring Boot, ReactJS, RabbitMQ, Kafka, Jenkins, Docker
- **Soft Skills:** Problem Solving, Analytical Thinking, Collaboration, Teamwork, Adaptability, Learning Mindset
